Washington State Utilities and Transportation Commission (WUTC) Permitted Solid Waste Carriers in Jefferson County (November 4, 2002)

Registered Trade Name of Solid Waste Company	Service Area	Certificate# (G permit)	Tariff #	Collect and Transport: MSW	Collect and Transport: Recyclables	Collect and Transport: Yard Waste	Residential Disposal Rates for Weekly Garbage Service by Container (Monthly charge in dollars)	Recycle Service Charge (When Taken With MSW Service)	Commercial Disposal Rates for Company Owned Containers (per Pickup, Non-Compacted Material)	Referenced Service Level Ordinances
Murrey's Disposal Company, Inc. DBA Olympic Disposal	Portion of Jefferson County (excluding the west end)	G-9	22	Y	Y	N	20 gallon mini-can \$14.99; 32 gallon can/unit \$18.76; 35 gallon toter \$20.50; 64 gallon toter \$26.44 Multi can/unit service up to 5 offered.	\$3.90	1 yard dumpster \$17.52; 1.5 yard dumpster \$24.50; 2 yard dumpster \$34.69; 6 yard dumpster: \$94.40.	None Indicated
Notes: None										
West Waste & Recycling, Inc.	Portions of western Clallam and Jefferson Counties, excluding Neah Bay	G-251	1	Y	N	N	20 gallon mini-can \$12.70; 32 gallon can/unit \$15.45; Multi can/unit service up to 5 offered.	Not Applicable	1 yard dumpster \$14.00 1.5 yard dumpster \$19.60; 2 yard dumpster \$27.70; 3 yard dumpster \$39.25; 4 yard dumpster \$55.40; 5 yard dumpster \$69.54; 6 yard dumpster: \$84.00	None Indicated
Notes: None										

General Notes

- The above solid waste carrier information is portrayed **for WUTC regulated solid waste carriers only**.
- Categories of solid waste customers defined by the WUTC include: single family residential, multi-family residential and commercial. **Multi-family rates are not depicted here.**
- Categories of commercial solid waste collection service as defined by the WUTC include: "Container Service - Non-Compacted - Company-owned container"; "Container Service - Non-Compacted - Customer-owned container"; "Container Service - Compacted - Company-owned container"; "Container Service - Compacted - Customer-owned container"; "Drop Box Service - Non-Compacted - Company-owned drop box"; "Drop Box Service - Non-Compacted - Customer-owned drop box"; "Drop Box Service - Compacted - Company-owned drop box"; "Drop Box Service - Compacted - Customer-owned drop box". **The only Commercial rates provided here are: "Container Service - Non-Compacted - Company-owned container".**
- According to statute, Washington State cities have the authority to contract for solid waste hauling services and associated billing, or to provide their own municipal collection service. Counties have not been granted this option by the legislature. However, statute does direct the WUTC to require regulated solid waste collection companies to comply with the service levels set in the local solid waste management plan. The WUTC defines the service area and monetary collection rates for private firms that service all county residents, as well as for private firms that service those municipalities which do not provide garbage collection service or contract for such service.
- **Of the 280 cities in Washington, 187 take advantage of their option to contract for service or provide their own service. Consequently, the WUTC regulates the solid waste haulers that service approximately 49% of the state's population.** (This includes 40% of the state's population that resides in unincorporated areas, and 9% of the state's population that resides in incorporated areas.)
- Currently, there appears to be no complete tabulation of solid waste collection rates charged to residents of Washington State municipalities is available, and thus there is incomplete knowledge of the direct economic impacts of solid waste disposal on approximately 51% of the state's population.
- [A Certificate \(or "G-permit\) means the certificate of public convenience and necessity issued by the Washington Utilities and Transportation Commission](#) under the provisions of chapter 81.77 RCW for the operation of solid waste collection companies.
- A tariff names rates for the collection, transportation, and disposal of solid waste, and if noted, recycling and yard waste (a document outlining rates, terms and conditions for providing service.) While the G-permit provides an overall legal description of the geographical area in which a carrier is allowed to operate, a tariff defines rates for services and service areas within the geographical area defined in the G-permit. Further, tariffs define the rates a permitted solid waste carrier charges to its residential, multifamily and commercial customers

Litter Crew Organization, Jefferson County, 2002

Started as a program for juvenile offenders, this year it became completely housed in the County Jail. Modeled after the Clallam County Chain-Gang organization. Corrections in-mates crew 4-5 days per week. They have an agreement with the Environmental Health Dept. to cover illegal dumps that have been reported.

2002 Biosolids Production and Land Application Information in Dry Tons for Jefferson County, (See footnotes)

Facility Name	Class of Biosolids	Compost Biosolids	Total Biosolids Produced	Total Land Applied	Total Land Applied: by Specific Application Site Categories						Landfilled	Incinerated	Transported to Another Facility	Name of "Transported To" Facility	Received from Another Facility	Name of "Received From" Facility and Associated Dry Tons

- 1) Data used here are gathered from individual facilities and consolidated into a main database from which this spreadsheet is derived. Referral to the actual report forms is suggested in order to resolve questions or before drawing conclusions.
- 2) Facilities which show zero production are for year 2002 only. Production amounts can vary by large amounts from year to year depending on lagoon cleanout operations, etc.
- 3) For the categories related to TRANSPORT TO and RECEIVED FROM, tonnage sums are totaled and reported in parentheses if the sums are different from that reported by the facility. Reasons for discrepancies are varied and need to be investigated on an individual basis if needed.
- 4) The term "ctd." means that the data for the facility is continued in another column where extra lines were used so that additional data could be included.
- 5) WWTP = Waste Water Treatment Plant; STP = Sewage Treatment Plant; BS = Biosolids; LSP = Lime Stabilization Plant; POTW = Publicly Owned Treatment Works.

Jefferson County Solid Waste Priorities and Needs for the Near Future:

- Public education is a top priority. Unfortunately staffing does not reflect this, with one person from the Health Department doing everything. Staffing is difficult with reduced budgets and Union demands. The Plan outlines a strong program that is directed to continuous movement toward sustainability.

Jefferson County's Projected Solid Waste Income and Spending, 1999 (as compiled by Jeff Kelly-Clarke, Director, Snohomish County Public Works)

Spending

Total Spending	Waste Handling*	LF Monitoring	Waste Reduction and Recycling	Moderate Risk Waste	Planning	Administration	Debt Service	Other	Capital Facilities/ Closure	To Fund Balance	Operating Budget
\$2,024,000	\$1,058,000	\$21,000	\$193,000	\$101,000	\$20,000	\$205,000	\$203,000	\$0	\$126,000	\$96,000	\$1,898,000

* "Waste Handling" includes transfer operations

Income

Total Revenue	Fees from Disposal	Other service fees	Dist./city fees	Grants	Interest	Fund Balance	Other	Total Revenue
\$2,024,000	\$1,817,000	\$6,000	\$0	\$35,000	\$7,000	\$132,000	\$27,000	\$2,024,000
